Workplace Noise: Recognition, Measurement, Control

MONDAY, APRIL 20, 2009

University of California, Los Angeles

Overview

Noise is one of the most pervasive yet underestimated hazards in the workplace. Noise does not kill, at least not directly, but failure to recognize and control it can lead to permanent hearing loss. This class, taught by a Certified Industrial Hygienist, gives safety and HR professionals and plant supervisors the tools needed to understand the hazard, measure it and control it. The class includes a hands-on workshop using measurement equipment.

Who should attend

Safety Professionals, Occupational Health Nurses, Plant and Operations Managers, Health and Safety Committee members, union representatives.

Accreditation

- ABIH— Certification of Maintenance Points from the American Board of Industrial Hygiene have been applied for
- Eligible for .75 COC Points (BCSP) and .6CEUs.
- 7.5 Contact Hours, California Board of Registered Nurses CEP#13555 (SCERC)

Faculty

Nola Kennedy, PhD, CIH, CHMM, Assistant Professor of Industrial Hygiene, Department of Environmental Health Sciences, UCLA.

Southern California Education and Research Center is a NIOSH ERC

Workplace Noise:

Recognition, Measurement, Control
