**DRS. ARTHUR WINER** and **LOUIS IGNARRO** have been identified as being among the most highly cited scientists in the environmental field by *ISI Highly Cited.com*, a Web site featuring influential scholars in science and technology.

## bookshelf

...recent books by UCLA School of Public Health authors

***Everything You Never Wanted Your Kids to Know About Sex, but Were Afraid They'd Ask,***

by Justin Richardson and **Mark A. Schuster**. Crown Pub. With confidence, wisdom and humor, the authors offer practical and often surprising answers to questions that bedevil parents at every stage in their children's coming-of-age.

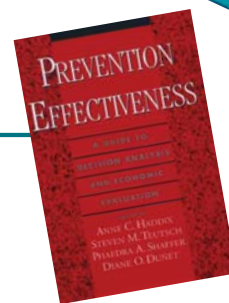

***Oxford Textbook of Public Health, 4th Edition,***

edited by **Roger Detels**, James McEwen, Robert Beaglehole, and Heizo Tanaka. Oxford University Press. The first three volumes provide a comprehensive review of the field, focusing on the scope, methods, and practice of public health, respectively. The fourth edition updates the many changes that have occurred since the third edition was published, expands to include issues of developing countries and presents the perspectives of public leaders on strategies to resolve existing and anticipated public health problems.

***Prevention Effectiveness: a Guide to Decision Analysis and Economic Evaluation, 2nd Edition,***

edited by Anne C. Haddix, Steven M. Teutsch, Phaedra A. Shaffer and Diane O. Dunet, with contributing authors including the UCLA School of Public Health's **Jonathan Fielding**. Oxford University Press. Provides public health practitioners with a tool kit for assessing the effectiveness and cost-effectiveness of prevention interventions.

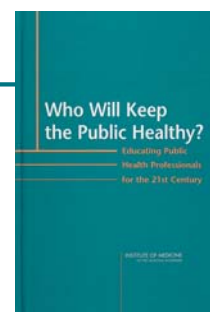

***Multilevel Modeling: Methodological Advances, Issues and Applications, 4th Edition,***

edited by Steven P. Reise and **Naihua Duan**. Lawrence Erlbaum Associates. Leading multilevel modeling researchers from around the world critically examine the real problems that occur when trying to use MLMs in applied research, such as power, experimental design, and model violations.

***Who Will Keep the Public Healthy? Educating Public Health Professionals for the 21st Century,***

by the Committee on Educating Public Health Professionals for the 21st Century, edited by Kristine Gebbie, **Linda Rosenstock** and Lyla Hernandez. Institute of Medicine of the National Academies. Suggests specific ways to improve public health professionals' capabilities to address new and complex challenges. Because the extent to which the nation can continue to protect the public's health depends in large part on the quality and preparedness of its public health work force, the findings of an inadequately prepared work force are of particular concern and need to be squarely addressed.

***Dr. Lester Breslow: Reflections on Public Health in California,***

by Adele Amodeo. Partnership for the Public's Health (a collaboration of The California Endowment and the Public Health Institute). An in-depth interview with one of the world's leading public health professionals offers a unique and compelling perspective on the state of public health in California covering more than a half-century.
